Knoxville Regional Transportation Planning Organization Annual List of Obligated Projects

Introduction

The Knoxville Regional Transportation Planning Organization (TPO) is the federally designated Metropolitan Planning Organization (MPO) required to carry out transportation planning for the TPO planning area. This area is based on the federally designated Knoxville Urbanized Area (UZA) that includes a number of jurisdictions, namely the City of Knoxville, Knox County, and parts of Anderson, Blount, Loudon, and Sevier Counties. The Knoxville TPO Planning Area encompasses the existing Knoxville UZA, along with contiguous area expected to be urbanized within 20-years. The planning area largely determines where federally obligated money can be spent.

Map of 2010 Knoxville TPO Planning Area

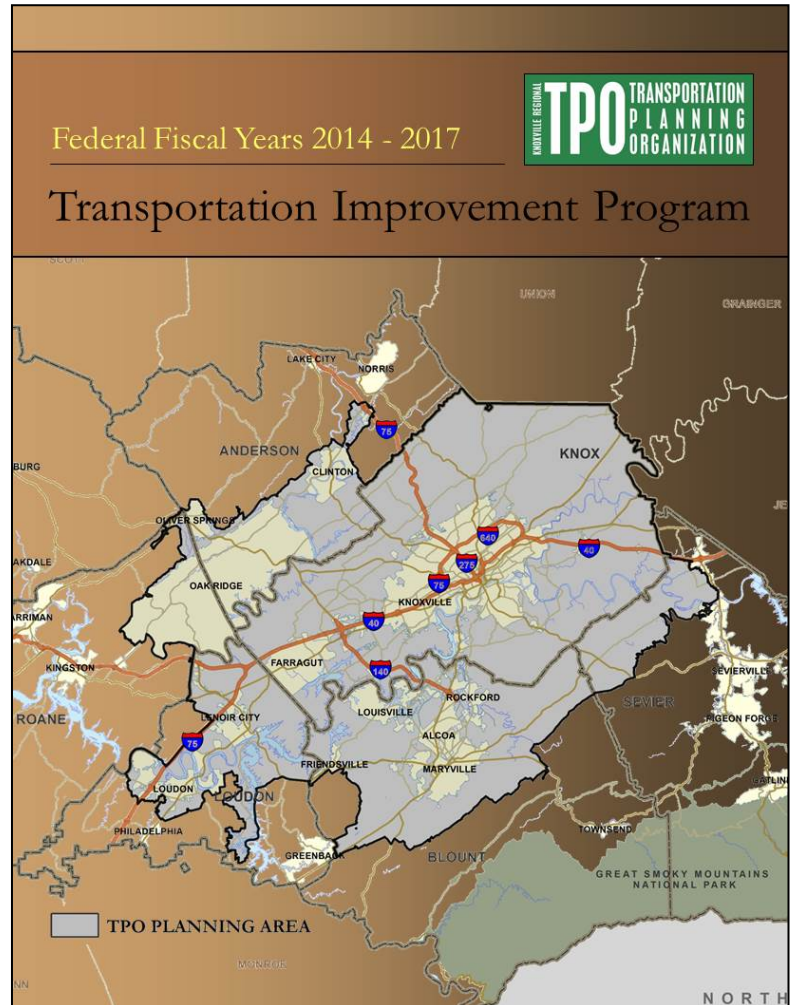

Purpose of This Report

The Knoxville TPO, according to the Moving Ahead for Progress in the 21st Century Act (MAP-21), is required to publish an annual listing of obligated projects for which federal funds have been given in the preceding year, including pedestrian and bicycle projects. The list of obligated projects is made available by the cooperative effort of the State, transit operators, and the metropolitan planning organization for review.

The annual listing of obligated projects for fiscal year 2015 are projects from the 2014-2017 Transportation Improvement Program (TIP) or prior TIP's. This program was developed in consultation with the Tennessee Department of Transportation (TDOT), Federal Highway Administration, Federal Transit Administration, and Environmental Protection Agency and adopted in October 2013 by the Executive Board.

Two terms of importance used throughout the report are programmed and obligated funds. Programmed funds are funds that have been identified in the TIP for a particular project and phase. This is similar to writing a check from a banking account for the amount of the project phase listed in the TIP. Obligated funds are funds that have been committed to the project phase by the Federal government. The funds for the project phase are considered obligated when the check is cashed. Obligated projects are not necessarily initiated or completed in the same fiscal year and the amount of the obligation may not necessarily equal the total cost of the project.

Knoxville TPO Obligations History (Fiscal Years 2008-2015)

Projects programmed in the TIP for fiscal year 2015 totaled \$271.5 million, a 13.5 percent decrease over programmed costs in 2014. This year, \$64.5 million, or 23.7 percent of the programmed amount was obligated (Figure 1).

Some of the larger obligated projects this year were the Halls Connector project (\$11.2 million), interchange improvements at North Broadway (\$10.1 million), Chapman Highway improvements (\$5.8 million), and interchange improvements at Dixie Lee Junction (\$4.0 million). These four projects accounted for 50 percent of the total amount obligated in 2015.

Starting in 2013, programmed amounts dramatically increased over the last three years as work on larger projects began. Examples of these are the widening of Maynardville Hwy (\$62.6 million), Henley Street Bridge (\$36.6 million), and Cumberland Ave Streetscape (\$22.8 million).

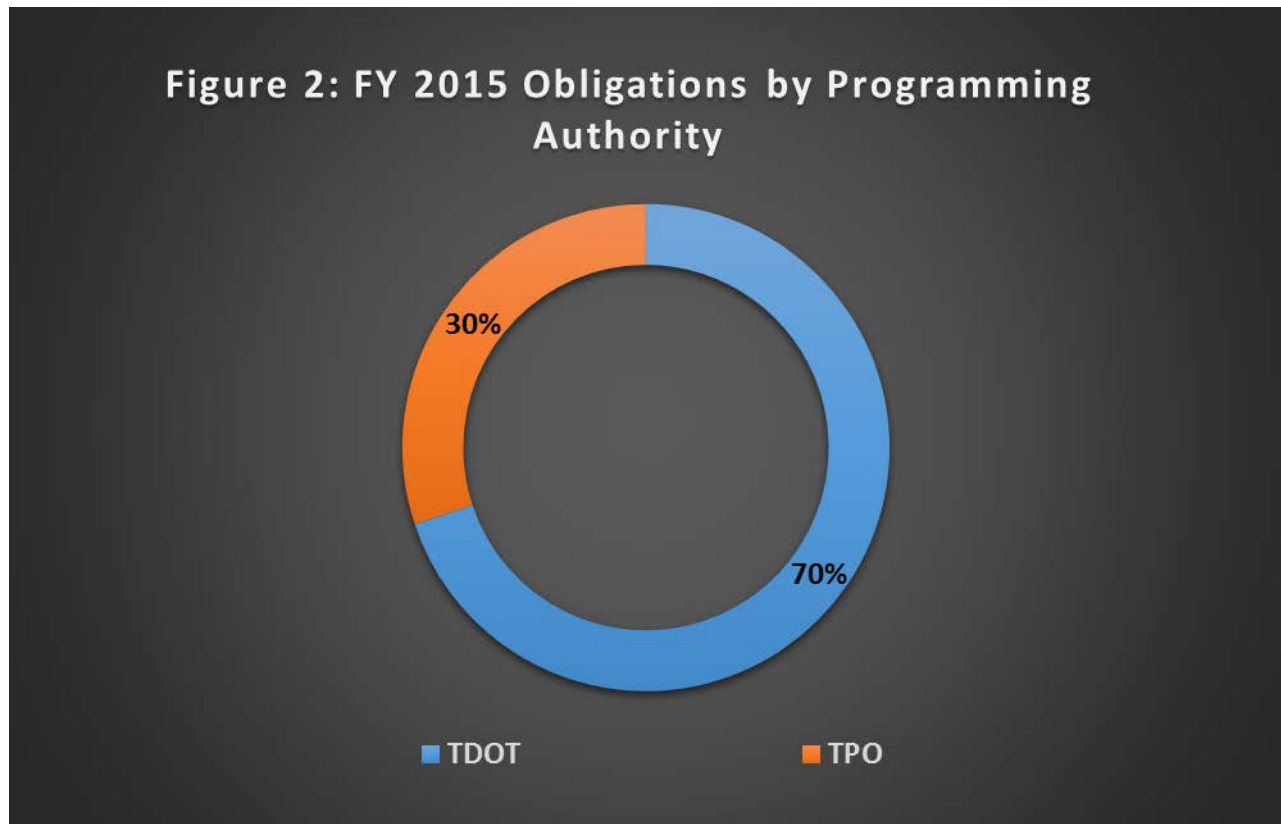

Summary of Fiscal Year 2015 Obligated Projects

Obligations by Programming Authority

Programming authority of federal funds is authorized by Congress to assist in construction, reconstruction, and improvement of transportation systems from highway/roadway projects, transit related projects, and pedestrian or bicycle improvements.

In 2015, \$64.5 million in federal funds were obligated in the TPO Planning Area. TDOT authorized \$45 million, or 70 percent of the funds, while the TPO authorized the remaining \$19.5 million (Figure 2).

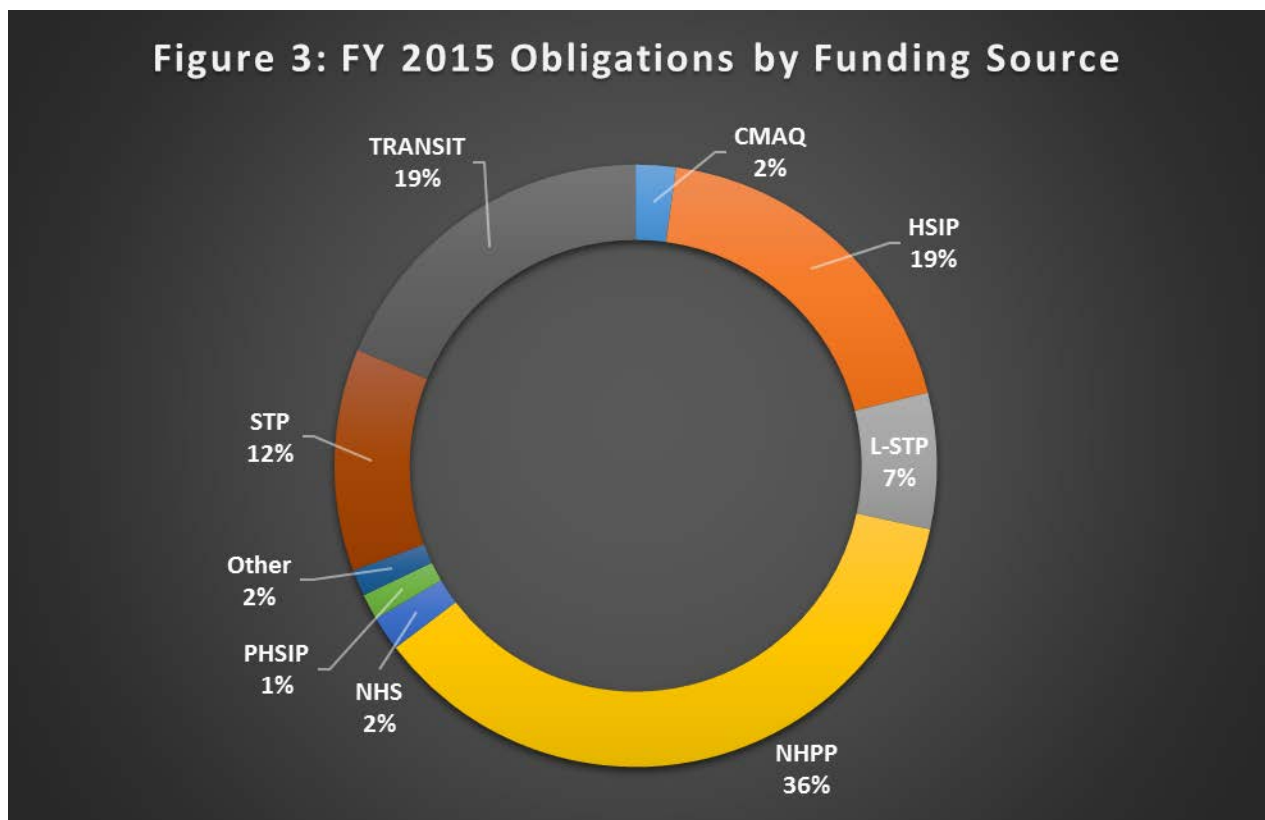

Obligations by Funding Source

The federal government provides multiple funding sources for the construction and preservation of state and local transportation infrastructure. The types of projects vary from new roadways, widening of existing roadways, intersection improvements, bridges, and general roadway maintenance. Other projects covered under federal funding are bicycle, pedestrian, and transit.

National Highway Performance Program (NHPP) funding accounted for the largest share (36 percent) of total obligations in fiscal year 2015 with \$23.4 million (Figure 3). NHPP funds are used by States to provide support for the condition and performance of the National Highway System through activities such as construction, reconstruction, resurfacing, preservation, and operation improvements. The second largest obligated amount was Highway Safety Improvement Program (HSIP) with \$12.2 million (18.9 percent), and Transit funding, which includes Section 5307, Section 5309, Section 5310, Section 5316, and Section 5317 followed with \$12.0 million (18.7 percent).

The remaining funding sources listed are Congestion Mitigation and Air Quality (CMAQ), Surface Transportation Program (STP), National Highway Safety (NHS), Penalty Highway Safety Improvement Program (PHSIP), and Other includes funds from Bridge Replacement and Rehabilitation, Interstate Maintenance, and Enhancement.

Obligations by System Type

There are many systems comprising a local transportation network including interstate highways, state highways, county roads, local roads, transit, and bicycle/pedestrian facilities. The type of system plays a major role in funding eligibility. The largest amount of funds obligated were to state routes (45 percent), while Interstate and Transit tied for second with 19 percent each (Figure 4).

KNOXVILLE REGIONAL TPO LISTING OF FHWA OBLIGATED PROJECTS FOR FISCAL YEAR 2015

Note: If the dollar amounts are enclosed in parantheses then the funds are credited toward the project.
